ABU-HALIMEH BROS. CONTRACTING CO.

Introduction

Abu-Halimeh Bros. Contracting Co. (AHCC) is the name behind many Advanced and prestigious Facilities. Since 1945, we have been providing our clients with reliable solutions to their most complex construction challenges. Today, we are recognized as one of the leaders in the local construction industry, for our strength in traditional construction methods and for our creative, fresh approach to cutting edge technologies and delivery systems.

Our expertise spans the construction industry spectrum, from smaller renovations to multi-million dollar projects. We specialize in industrial facilities, commercial, recreational and hospitality buildings, as well as our main specialty in infrastructure projects such as earthworks, Roads, water and waste water projects and treatment plants. Our success is driven by more than building some of the advanced facilities for our corporate, private and government clients. More and more of our clients are turning to us for our distinctive ability to implement innovative project management techniques and to serve as a reliable provider of knowledge-driven solutions for their construction Projects.

Our team of construction professionals offers solution for all of your construction related needs. Whether it is restoration, site preparation, a new facility or facility renovation, we have the experience and Personnel to provide the highest quality construction on schedule and within budget. We support our clients from project inception, to the commissioning of the fully operational facility. And our office enables us to offer our clients the dual advantage of a strong local presence and broad geographic reach.

Mission and Vision

Mission

To safely and profitably serve our clients' construction needs while maintaining a reputation for quality, integrity and employee satisfaction.

Vision

AHCC is committed to being a construction contractor that is known externally for quality, integrity and resourcefulness, and internally for profitability and employee satisfaction.

Why AHCC?

AHCC Approach

Building a successful project is contingent on the management capabilities of the company performing the work and always based on client satisfaction. Continuously building quality projects requires a company-wide mindset that unites all team members behind one main purpose - Building Excellence. At AHCC, we believe integrity and high performance standards must come from the top; this is why our senior executives are involved in our projects from day one and stay Involved until the final closeout. The key to professional project execution is fundamental – anticipate and eliminate problems before they happen. Our team works with the owners, construction team, designers and engineers, with the detail that only specialists can provide, to plan, budget and schedule every aspect of your project. Once construction begins, sound management skills, seasoned field supervision and sophisticated computer management technology work together with competent subcontractors and suppliers to keep your project on track. The result is a quality facility that is complete when promised, as promised.

AHCC Commitment

A commitment is only as good as the company that makes it, constructing facilities that are economical, reliable and efficient has been AHCC commitment since 1945. Our team of construction professionals offers solution for all of your construction related needs. Whether it is restoration, site preparation, a new facility or facility renovation, we have the experience and personnel to provide the highest quality construction on schedule and within budget.

AHCC Financial Strength

Our financial strength comes from the depth of our experience established over more than 6 decades of history. Our bonding capacity has grown to accommodate our largest projects and has helped us grow our management and technical resources over the years. This long standing stability, along with our commitment to Construction excellence, provides our clients with the peace of mind and confidence that we have the resources to stand behind our work for many years to come.

AHCC Values and Culture

AHCC's core values drive everything we do. Incorporating these core values in our daily work, and making them an integral part of our culture, is key to our future success. Our values solidify who we are and what we believe.

AHCC's values are:

Uncompromising commitment to Quality,
Health, Safety and Environment

An open relationship with our employees based on mutual trust,
respect and success transparency, accountability and Discipline in
our business Best in class Risk Awareness

Integrity in all we do Financial Responsibility to our stakeholders

AHCC culture begins with our people; we like to think of ourselves as one big family working together toward one goal - Building Excellence. Our company culture is a mix of hard work, fun, mutual respect and a strong commitment to our clients and community. There is close friendship among the employees of this family-oriented company that adds value to their working and personal lives. We strive to maintain an open, family-like atmosphere in our offices and on our job sites. Like most families, our expectations are high. We recruit and retain only the most talented and enthusiastic employees, many of whom have been with AHCC for over 20 years. We encourage teamwork and collaboration. We support and reward individual initiative and resourcefulness. We value problem solvers and effective communicators and acknowledge and celebrate the contributions and accomplishments of others - fellow employees as well as our project partners. Each year everyone looks forward to planning and attending the many traditional AHCC events like the annual family picnic and annual meeting, as well as group outings, holiday parties and retreats.

Safety

At AHCC, we are committed to safety above all else, and this commitment is central to everything we do. Our proactive approach creates value for our clients and safeguards our most important asset: our employees. Our entire team is dedicated to maintaining a safety-focused and environmentally sound business; our safety culture is promoted by each member of our team through planning, implementing and evaluating safety practices on a daily basis.

ABU-HALIMEH BROS. CONTRACTING CO

Our safety program is proactive and action-oriented; everyone from management to trades people is involved in making a zero-incident workplace a reality. We use daily pre-task planning sessions, ongoing safety inspections, weekly safety meetings, safety seminars, special equipment training, safety manual reviews and email updates to assist in attaining our goal of zero incidents.

Our supervisors receive training in the OSHA Program, as well as classes in Fall Protection, Excavation and Trenching, First Aid, CPR and Confined Space Entry Procedures, Substance Abuse Awareness and recognition. New employees are required to complete our new Hire safety orientation program.

Our safety culture at AHCC focuses on keeping motivational messages and emotions at the forefront of everything we do - every day. Family-oriented messages remind us to keep safety at the top of our minds with posters and banners placed throughout our projects bringing our families to the jobsites with these visual reminders positively impacts how we approach and value safety.

TotalQualityManagement

AHCC Management Statement

The construction industry is responsible for the socio-economic development of a country and thus this industry is driven by, focused on and centered in people. Construction practitioners world-wide are increasingly becoming aware that they cannot concentrate primarily on the technical aspects alone and ignore the workers and others who may be adversely affected by construction activities. In most developing countries, safety consideration in construction project delivery is not given a priority.

The current approach is that safety interventions occur in response to Specific, often major accidents or injury. The reactive management approach used for safety management is contrary to the proactive management approach used in other aspects such as quality, productivity and the like. Integration of safety and quality management using Total Quality Management has the potential of enhancing safety performance in the construction project delivery process. On the basis of an overview of the situation of occupational health and safety in the Jordanian Construction industry, this paper seeks to demonstrate the different modalities for integration of safety and quality, and their applicability to the construction project delivery process in developing countries.

AHCC places a high value on the safety and performance of its employees.

AHCC is also committed to providing a safe Workplace for all employees and has implemented the principals of total Quality Management since well-implemented Quality Management System (QMS) can be one of the most important forces leading to organizational growth and success in national and international construction markets. In the competitive business climate It is critical for construction companies to provide consistently high -Quality products and added-value to their clients and customers.
